

ACE INTELLI-BREW SERIES BREWER

MODEL IA-TC

Carafe
not
included

Tank Heating System

- Reduced Operating Cost – select from 2 power saving modes to automatically turn off or throttle back the tank heating system during periods of non-use to prolong component life as well as save on energy cost.
- Normal Operation Mode – Tank temperature maintained at present level.
- Tank Protection – will not allow tank heater to operate without sufficient water present. This protects against heater burn out.
- Auto Arm – When brew cycle is started system checks tank temperature and displays flashing light until optimum brewing temperature has been reached before brewing.

Water Delivery System:

- Auto Pre Fill – Ensures that the correct volume of water is present before beginning the brew cycle eliminating “short pots”.
- Auto Time Off – If the brewer fill time exceeds 3 minutes, the brewer will automatically shut off. This prevents any runaway condition or signals that the water line has been restricted.
- Visa Brew – light flashes during brew cycle to alert the operator that the brew cycle is in process and to proceed with caution.
- Dual Volume Setting – Intelli-Brew Dispenser and airpot models offer optional dual volume setting for half pot and full pot.
