STVTD Short

NEWCO has one coffee machine that serves THREE separate coffee profiles. TVT technology from Newco, simply makes your beverages taste better. TVT controls the three vital aspects of the coffee brewing recipe: water temperature, water volume, and water contact time. TVT opens up a new world of taste profile control by allowing you three different settings. Now you can brew into three different size dispensers and/ or three different strengths with the same machine. You control the time, volume and temperature. TVT, only from Newco, making you successful your way.
