

LITTLE JOE

POD BREWER

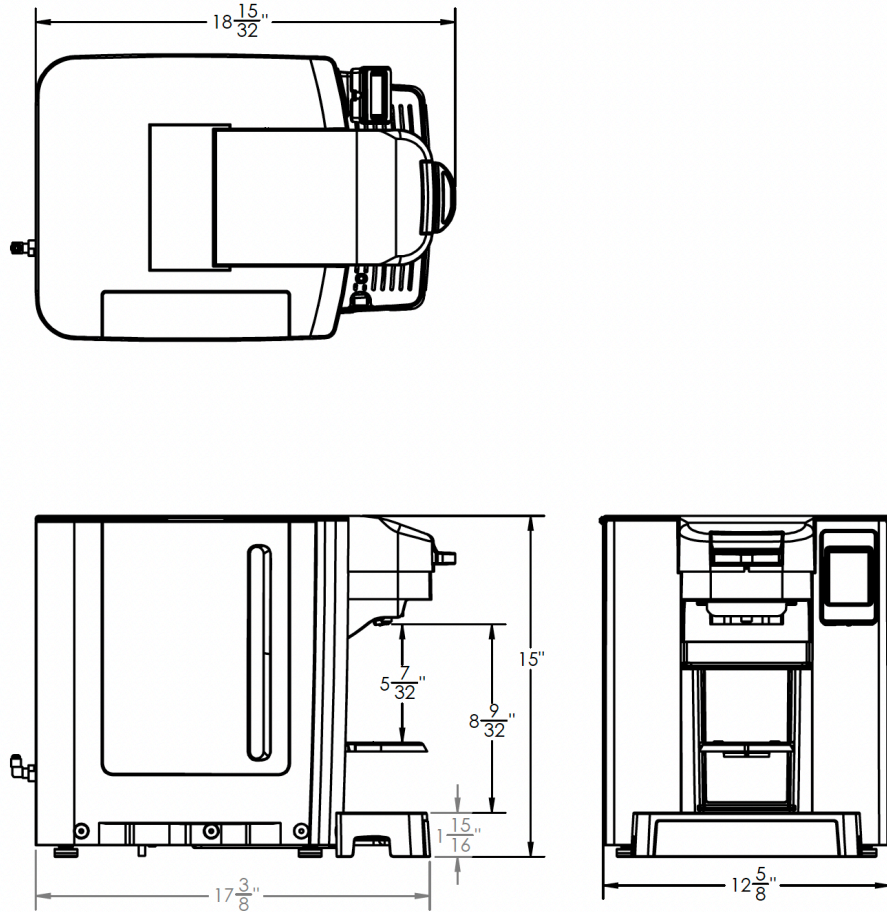

Canadian Multi-Language | 153286

Features

- Multi-language support with English and French.
- Built-in option of pour over or direct plumbed in every unit, making it easy to provide drinks throughout the workplace with or without a water line.
- With a 90oz reservoir tank and the ability to heat 26oz of water at a time in its boiler, the Little Joe reliably brews cup after cup
- Easy to use touchscreen gives options for drink selection, customization, and programming of features.
- Drop down drink tray accommodates anything from travel mugs to traditional, smaller cups.
- Auto/Manual ejection system disposes of brewed pods into integrated waste bin upon opening of unit.
- Calibrate key brewing parameters such as pre-infusion and pulse brewing for optimal extraction and taste profile for a variety of coffee and tea pods.
- Conserve energy usage with smart heating only during periods of use.

Small workplaces can now upgrade to Newco's Little Joe soft pod brewer. Equipped to brew environmentally friendly soft pods and designed to deliver delicious brews morning after morning, the Little Joe's versatility and compact footprint allow for placement anywhere. The dual ability to use either the auxiliary water reservoir or a direct water line lets you get it brewing on day one, regardless of plumbing set up. Engineered for flexibility, capability, and compactness, make each morning better for your team with the Little Joe.
