WARRANTY

This warranty supersedes all other previous warranties that are currently in manuals. Newco warrants equipment manufactured by it for 1-year parts and labor. Accessories, Dispensers, and Display Tablets - 1 Year parts only. Electronic Circuit and Control Boards- 3 years parts, 1 year labor. Equipment manufactured by others and distributed by Newco- please see original equipment manufacturers warranty, Newco will follow.

These warranty periods run from the date of sale Newco warrants that the equipment manufactured by it will be commercially free of defects in material and workmanship existing at the time of manufacture and appearing within the applicable warranty period. This warranty does not apply to any equipment, component or part that was not manufactured by Newco or that, in Newco's judgment, has been affected by misuse, neglect, alteration, improper installation or operation, relocation or reinstallation, improper maintenance or repair, incorrect voltage applied to the unit at any time, damage or casualty. This warranty does not apply to any equipment failures related to poor water quality, excessive lime and chlorine and non-periodic cleaning and descaling. Warranty is null and void if muriatic or any other form of hydrochloric acid is used for cleaning or deliming. In addition, this warranty does not apply to replacement of items subject to normal use including but not limited to user replaceable parts such as faucet seat cups, sight gauge tubes, washers, o-rings, tubing, seals and gaskets.

This warranty is conditioned on the Buyer 1) giving Newco prompt notice of any claim to be made under this warranty by telephone at (800) 556-3926 or by writing to **3650 New Town Blvd, Saint Charles, MO 63301**; 2) if requested by Newco, shipping the defective equipment prepaid to an authorized Newco service location; and 3) receiving prior authorization from Newco that the defective equipment is under warranty.

THE FOREGOING WARRANTY IS EXCLUSIVE AND IS IN LIEU OF ANY OTHER WARRANTY, WRITTEN OR ORAL, EXPRESS OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, ANY IMPLIED WARRANTY OF EITHER MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE. The agents, dealers or employees of Newco are not authorized to make modifications to this warranty or to make additional warranties that are binding on Newco. Accordingly, statements by such individuals, whether oral or written, do not constitute warranties and should not be relied upon.

If Newco determines in its sole discretion that the equipment does not conform to the warranty, Newco, at its exclusive option while the equipment is under warranty, shall either 1) provide at no charge replacement parts and/or labor (during the applicable parts and labor warranty periods specified above) to repair the defective components, provided that this repair is done by a Newco Authorized Service Representative; or 2) shall replace the equipment or refund the purchase price for the equipment.

THE BUYER'S REMEDY AGAINST NEWCO FOR THE BREACH OF ANY OBLIGATION ARISING OUT OF THE SALE OF THIS EQUIPMENT, WHETHER DERIVED FROM WARRANTY OR OTHERWISE, SHALL BE LIMITED, AT NEWCO'S SOLE OPTION AS SPECIFIED HEREIN, TO REPAIR, REPLACEMENT OR REFUND.

In no event shall Newco be liable for any other damage or loss, including, but not limited to, lost profits, lost sales, loss of use of equipment, claims of Buyer's customers, cost of capital, cost of down time, cost of substitute equipment, facilities or services, or any other special, incidental or consequential damages.

WARNING: *Read and follow installation instructions before plugging or wiring in machine to electrical circuit. Warranty will be void if machine is connected to any voltage other than that specified on the serial tag. Machine must be plugged into a grounded outlet.*

SERVICING THE MACHINE

DRAINING THE HOT WATER TANK

WARNING:

Disconnect brewer from power & allow hot water to cool completely before attempting to drain water tank!

1. Toggle brewer power switch **OFF** & disconnect machine from power source.
Note: Give ample time for hot water in tank to cool before beginning process!
2. Locate the tank drain plug at the bottom of the brewer back panel.
3. Gently pull on the plug & extend the drain tube out from brewer compartment.
Note: The drain tube has a clamp attached.
4. Remove the drain plug from the end of the drain tube.
5. Direct drain tube into a container or drain. Ensure your hands are away from the end of the tube.
6. Slide the tube clamp to release the water.
7. Once the water has finished draining, slide the clamp back to close off the drain tube.
8. Insert the drain plug onto the end of the drain tube.
9. Push the drain tube back into the machine & push the drain plug back into its opening.

2.
Locate drain plug

3.
Pull drain plug to extend drain tube out

5.
Direct tube into a container or drain **BEFORE** sliding clamp!

CAUTION!

Released water may be hot!
Keep hands away from drain tube opening.

6.
Slide tube clamp to release water

SERVICING THE MACHINE

WHIPPER MAINTENANCE INSTRUCTIONS

Daily Cleaning

A rinse of the whipper should be performed multiple times a day.

Additionally, whenever the hoppers of the machine are put back into place after removal, the machine display will prompt a rinse cycle to be run.

Rinse Cycle Procedure

1. Open the door to the brewer & place a cup under the dispense nozzle.
2. Press the **RINSE** button located to the side of the whipper.
3. Hold the **RINSE** button until the water dispensed from the nozzle runs clear.
4. Discard the water dispensed during the rinse cycle.

Whipper Seal Cycle Count

Before beginning the physical maintenance of the whipper, it is important to check the status of the whipper seal cycle count in the Machine Programming → Maintenance menu.

The whipper seal needs to be replaced every **5000 cycles**.

1

Tap where circled three times to enter the Programming Menu.

2

Select "Maintenance"

3

Do not press "Whipper Seal Reset" unless you are replacing the Whipper Seal!

NOTE: You must press "Exit Maintenance Mode" then "Exit Programming" before turning off machine power!

SERVICING THE MACHINE

WHIPPER MAINTENANCE INSTRUCTIONS

To Remove the Whipper Parts from the Machine

WARNING:

Disconnect brewer from power before servicing or installing machine components!

1. Run a rinse cycle to remove any powder from the whipper bowl.
2. Turn machine power **OFF** & disconnect brewer from power.
3. Turn hopper elbows upwards.
4. Disconnect dispense nozzle from whipper & remove the whipper cap.
5. While holding onto the whipper bowl, turn the knob of the base counterclockwise from the 6 o'clock position to the 5 o'clock position.
6. Pull whipper bowl away from the machine.

7. Remove the impeller from the motor shaft.
Note: The impeller is set securely in place. You may need a bit of force to remove it.
8. Turn the knob on the base counterclockwise from the 5 o'clock position to the 4 o'clock position to unlock it from the motor. You may need to wiggle the base to remove it from the motor shaft.
9. Push the whipper seal out of the whipper base.

Cleaning the Whipper Assembly

Wash all whipper components with warm soapy water & thoroughly rinse. Wipe down the motor shaft with warm soapy water to remove all old lubrication. Ensure all components are completely dry before reassembly.

SERVICING THE MACHINE

WHIPPER MAINTENANCE INSTRUCTIONS

Reinstalling the Whipper Assembly

STEP ONE: SET THE WHIPPER SEAL INTO THE WHIPPER BASE

1. Locate the small, raised line on the whipper seal and the whipper base.
2. With the raised indicators aligned, press the conical side of the whipper seal into the back of the whipper base. See images below.

WARNING

If the indicator marks are not aligned properly, whipper seal will not be fully seated on the whipper base.

Whipper seal will become misshapen, impacting the performance & lifespan of the entire brewer.

STEP TWO: LUBRICATE WHIPPER SEAL & INSTALL WHIPPER BASE ONTO WHIPPER MOTOR SHAFT

1. Cover the hole in the whipper seal with one finger.
2. Fill the seal with food grade lubricant (**PN 900039**)
3. Slide the base & seal onto the motor shaft.
4. Turn the whipper base so that the notch is in the 5 o'clock position.

WHIPPER MAINTENANCE INSTRUCTIONS

Reinstalling the Whipper Assembly *(continued)*

STEP THREE: INSTALL THE IMPELLER ONTO THE MOTOR SHAFT

1. Locate the arrow on the impeller & the flat section on the motor shaft.
2. With the front of the impeller (shown below) facing away from the motor, align the arrow indicator with the flat section of the motor shaft.

3. Slide the impeller onto the motor shaft. An audible click will be heard when the impeller is correctly set into place.

WHIPPER MAINTENANCE INSTRUCTIONS

Reinstalling the Whipper Assembly *(continued)*

STEP FOUR: INSTALL THE WHIPPER BOWL ONTO THE WHIPPER ASSEMBLY

1. Place whipper bowl into the groove of the whipper base.
2. Turn the knob of the whipper base clockwise from the 5 o'clock position to the 6 o'clock position.

STEP FIVE: REPLACE CAP & NOZZLE ONTO THE WHIPPER BOWL

1. Attach cap & nozzle to the whipper bowl.
2. Connect to appropriate parts in the brewer.

SERVICING THE MACHINE

REPLACING THE PUMP HEADS

WARNING:

Disconnect brewer from power before removing panels & servicing/installing machine components!

ACCESSING THE PUMP HEADS

1. Toggle brewer off & disconnect from power.
2. Disconnect BIB liquid concentrate. Remove liquid product from sidecar or cabinet.
3. Rotate hopper elbows upward and remove product hoppers from cabinet.
4. Use a Phillips head screwdriver to loosen the three screws holding the product shelf in place. Remove shelf and set aside.

REMOVING THE PUMP HEADS

1. Remove the wireform clip from two-product mixing chamber.
2. Rotate the two-product mixing chamber so that pump check valves are unobstructed from mixing chamber bracket.
3. Pull out pump tube from two-product mixing chamber ensuring that the check valve comes out fully. Disconnect other tube from John Guest fitting inside of brewer cabinet.
4. Pinch left and right side clasps inward on the pump head and pull straight back to remove.

SERVICING THE MACHINE

REPLACING THE PUMP HEADS

REPLACING THE PUMP HEADS

1. Prep the motor shaft by buffing **directly outward** with emery cloth.
2. Position the new pump head assembly so that the tube with the **duck bill tip** is on the **RIGHT** side.

3. Align the motor shaft with the pump head assembly hole. Hold assembly at a 45-degree angle and apply pressure until it slides onto the shaft.
4. Press the new pump head assembly onto the shaft until you hear an audible click. *(click indicates that the Left / Right clasps are properly latched into place.)*
5. Detach duck bill check valve from new pump assembly. Insert check valve into mixing chamber, then insert **RIGHT** side tube stem into check valve.

6. Rotate two-product mixing chamber back into position, ensuring that check valves and plastic stems are positioned **UNDER** mixing chamber bracket.
7. Replace the wireform clip on to the two-product mixing chamber.
8. Insert the other tube from the new pump head assembly into the appropriate John Guest fitting.

SERVICING THE MACHINE

SIDE CAR ACCESSORY PRODUCT INSTALLATION

PRODUCT INSTALLATION

1. Open product box.
2. Remove the plastic insert from the BIB fitment.
3. Using finger and thumb only to prevent over-tightening, thread the BIB connector on to the BIB fitment until seated.
4. Place product in sidecar with BIB facing up. slide into place and replace door.
