

LTB

DUAL POST MIX TEA STYLE DISPENSER WITH INTEGRATED BEVERAGE PUMP

Introducing Newco's LTB series, the on-demand tea dispenser that looks like a traditional fresh brewed iced tea system. LTB consistently blends BIB concentrate and dilution inside the brew basket and dispenses into Newco's narrow tea dispenser giving the consumer the look and feel of freshly brewed tea. The LTB eliminates the inconsistency and headaches of fresh brewed tea systems by delivering perfectly blended tea (sweet or unsweet) in a matter of minutes. There's no messy tea leaves and filters to discard at the end of the cycle. Simply press a button and immediately begin to dispense freshly prepared tea. Save counter top space with Newco's narrow urns. Rotate the basket left or right to deliver the tea into either dispenser.

Brew twice as much tea per hour compared to a traditional tea brewer.

Brew only the volume that you need depending on the day part, eliminating waste. LTB can brew any volume needed from 1/2 Gallon to 3 Gallons per brew.

Brew consistent sweet tea every time.
No mixing of sweeteners inside the dispenser.

2 independent pump systems allows for a choice of product, flavor, natural and sweet product options.

BIB hook up external for connection to Scholle or Liquid Box.

Out of product light.

Flow rate: 2 ounces per second.
Product volumes adjustable range from 4 - 1 to 20-1.

Sanitation cycle for cleaning the dispenser as well as the container.

Individual power switch.

Stainless steel construction with high end graphics on the front and sides. Custom branding available.
