NK-PPAF  
PN: 705118

The NK models incorporate such features as a ready brew light for optimum brewing temperature, independent hot water faucet, and back-up pour in feature. We have added a branding box that offers an updated style hiding the switches from the end user, while providing a sleek cover with the option of your company's logo and artwork to capture your coffee audience. Switches are viewable with a simple flip, and giving the operator brewing instructions at a glance. Private labeling is now offered with Newco's State of the Art Branding capabilities.

# NK-PPAF

## Low Profile Design:

Allows unit to be easily placed with out modifications to locations. Fits under low cabinet construction.

## Ready Light:

Provides visual notification to user as to when brewer is at optimum temperature in which to brew.

## Back-up pour-over:

Allows the account to continue to have fresh brewed coffee even if an interruption in the automation of the machine or water line should occur.

## Detachable Base:

Detachable base allow thermal models to be converted to brew into a variety of thermal bases.
