Newco's Branding Capabilities

What is a Private Label?

A custom faceplate label, wrap, and or counter mat with your company's design gives you the flexibility to place your message exactly where you want. Big or small, one or one hundred. We have the latest in printing technology. We work with a variety of design software and produce almost everything in house giving you full control over the quality and the creative look you desire.

Why Private Label?

How you brew your coffee and tea is very important. The brewer you choose should reflect your product and business. It identifies you, your products, your equipment and your quality. This can also protect your investment from theft. Invest in your client's too, we also co-brand, put your client's logo on the brewer along side yours, and watch the appreciation and excitement it creates.

Pick Your Brewer and Dispenser:

Choose what brewer or coffee dispenser you would like to customize. We have brewers that fit all applications, small pour over and automatic brewers for office locations to large commercial models that support the volume of C-store and restaurant environments. Then match your serving vessel.

Stock Designs:

We offer several generic design styles (shown left) that can be chosen and applied. This makes for a fast enhancement to any vessel or brewer faceplate. One catch...no customizing, but no set-up fee just the label cost. **Want our style with your name...no problem, we'll make it custom just for you. (See "Custom" section below)*

Need Custom Labels:

We'll customize it! You can create a quick custom look simply by adding your company name and/or logo to any of our stock designs. For a more dramatic approach, create a design from scratch. Choose to work with one of Newco's graphic designers to create the look and feel you want from your private label; or have us e-mail the template(s) you need for your design team to complete. One time set-up fee per label of \$150 applies, and then it's simple, just the cost of the label. You can't beat custom branding your equipment for a few dollars more for the look you always wanted.

Applying Your Labels:

We can apply your labels before they leave our manufacturing plant or we can send you what you need to update your look out in the field.
