Stackable Variety
Tea Urns.

Features

- Digital Electronics allows brewing up to 3 independent beverage volumes, with the ability to enhance the taste profile of the beverage by adjusting the brewing temperature and the water contact time with or without water bypassing.
- Simplex programming, with TVT technology, all you need to know is: How Much Total Volume, How Much Tea Concentrate, How Long to Brew and you have programmed your recipe.
- Brewer incorporates patented base design which allows for height adjust-ability.
- Auto Arm - System will not brew until the water reaches the correct brewing temperature.
- Vis A Brew - Brewing alert System is adjustable from 3 independent times to match the brewing process you select.
- Stainless Steel construction with back up pour over feature.
- Dual Voltage 120/240
- Brew Capacities: 30 Ounces up to 5 Gallons
- 3 independent brew buttons can be customized with product labels for ease of brewing.

NEWCO has one machine for several methods of hot tea and iced tea brewing. TVT technology from Newco, simply makes your beverages taste better. TVT controls the three vital aspects of the tea brewing recipe: water temperature, water volume, and water contact time. TVT opens up a new world of taste profile control by allowing you three different settings. Now you can brew three different beverages and/or three different strengths with the same machine. You control the time, volume and temperature. TVT equipped brewers greatly enhance account profitability by allowing multiple beverages to be brewed on a single unit while dramatically reducing installation and set up time. TVT, only from Newco, making you successful your way.
