

NEWTAP

DESIGNED FOR GLASS AND THERMAL BREWERS

Providing breakroom solutions with fewer touch points is now more important than ever. Consumers are looking for options to enjoy their hot beverages at work without picking up servers or touching common surfaces.

The Newtap has always been a great tool for converting glass bowl brewers to increase the coffee volume from ½ Gal to 1 Gal in the same footprint while adding a convenient faucet to dispense. Now, either a glass bowl brewer or a thermal brewer can be easily adapted to accommodate a Newtap with the new touchless faucet.

Create a safer environment by adapting batch brewers to a touchless dispense self serve station.

TOUCHLESS
SOLUTIONS

NEWTAP ASSEMBLY KITS

DESIGNED FOR GLASS BREWERS

Ring secures the vessel so its stays in place during push operation.

Legs raise the brewer so the cup will fit under faucet when depressed.

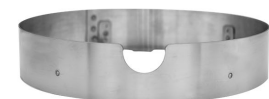

NEWTAP Features :

- Holds twice the coffee.
- 1 gallon stainless steel dispenser.
- Replaces decanters on warmer model brewers.
- Sight gauge allows users to see level of coffee.
- High quality stainless construction.

Retrofit your glass bowl brewer to the Newtap Touchless dispensing solution. The warmer ring secures the vessel in placing for safe and secure dispensing. The curved shaped bottom keeps coffee fresh and hot by reducing the surface contact with the warmer plate.

The Newtap Assembly Kit Includes:

- a. Newtap Dispenser
- b. Small No Touch Handle
- c. Safety Ring Assembly P#201306
- d. Drip Tray P#781488
- e. 4 Brewer Leg Assemblies P#100662

| Part Number | Model | Description | Weight |
|-------------|---------------------|---|--------|
| 104412 | Newtap Assembly Kit | Newtap, No Touch Handle, Safety Ring Assembly, Drip Tray, Brewer Legs | 5 LBS |

DESIGNED FOR THERMAL BREWERS

Newco's kits for thermal batch brewers allow existing thermal brewers in the field to be easily updated to the touchless Newtap solution. Whether the need is temporary or permanent you can quickly convert several Newco model brewers to accommodate the new touchless Newtap. The warmer stand conforms to the existing brewer base and allows consumers to access fresh coffee without touching anything but their cup. The stand features a safety ring to securely hold a Newtap server equipped with a touchless dispense handle.

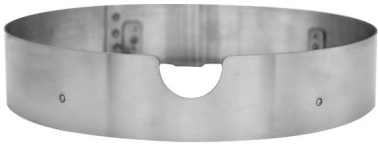

[Size options shown on back.](#)

No touch dispense system that fits within current brewer base or on its own. Allowing consumer to access fresh coffee without touching anything but their cup.

Features :

- Easily convert existing thermal brewers to Newtap touchless solution.
- Kits designed for ACE LD, ACE AP and 20:1 LD model brewers.
- 1 Gallon capacity
- Standard 120v, 15amp plug.
