

360 HAND SANITIZER STATION

4 DIRECTIONAL DISPENSING STATION

TOUCHLESS
SOLUTIONS

The 360 Hand Sanitizer Station creates a convenient and touchless option for high traffic environments. The station configuration allows access to hand sanitizer from all four sides and uses motion activated technology to dispense the correct amount of sanitizing liquid.

Add ons are available for this unit, such as: a plexiglass divider to add another layer of protection for users and a mask dispenser for those who may need a mask.

Features

- The 360 Hand Sanitizer Station configurations to allow access from multiple sides or 360 degree access, ideal for entrances and exits as well as large gatherings.
- Large Capacity - utilizes one gallon bottle of hand sanitizer in internal storage compartment with key lock. Sanitizes hands for up to 1,250 people before needing a refill.
- Touchless Dispensing - position hands under any dispense nozzle to sanitize hands. (Adjustable calibration of sanitizer amount)
- Internal Battery - allows for charging or using removable power banks for freedom to set up station anywhere.
- Stainless Steel Construction - heavy duty, durable, and "Made in the USA" (US Patent Pending)
- Protective Shield - mounts on top of unit to separate users and increase safety.
- Custom Graphics available from our graphics team.
- Has a mask dispensing cap.
