

CAFE ESPRESSO

BEAN TO CUP

Newco PN: 152774

Shown here with included extended bean hopper, extra capacity base, and milk thermos.

Features

- Makes 6 different drinks, including layered coffee and milk with only one touch.
- Integrated hot water spout eliminates the need to move the cup to prepare any drink.
- Professional frothing head delivers perfectly hot or frothed milk. Easy to use, remove, and keep clean.
- Automatic cleaning cycles keep the Cafe Espresso performing at it's optimal level.
- Adjustable coffee spout from 3.15 to 5.5 inches, accommodates a wide range of cup sizes from demitasse to a large cup, while reducing splash.
- Portable pour-over design with the ability to connect to bottled water. (Cannot be hard plumbed)

Our super automatic - one step specialty drink machine. Prepare Coffee House quality drinks with intelligent "one touch" control wrapped in a sleek modern design. Choose your coffee's perfect grind from 5 available settings. Personalize your drink with the intuitive touch wheel, by controlling the amount of espresso or milk during preparation. Cafe Espresso delivers espresso and specialty drinks any barista would be proud to serve.

Mini Fridge

The Newco Mini fridge is a stylish and convenient way to keep your milk cool and displayed right next your Café Espresso Coffee machine. Keeping milk at the right temperature is crucial in the world of coffee. We all know, milk will spoil quickly if not kept cold. Did you know warm milk produces lesser quality milk foam? That is why we offer a separate milk fridge for use with your Café Espresso unit which is also ideal for small office machines.

Mini Fridge Measures 13"H x 8.4"W x 10.8"D
