

# COLD BREW BREWER

PREPARED FRESH AND FAST

## Features:

- Brews with ambient water (no hot water) to prepare authentic cold brew coffee.
- Never run out of cold brew coffee again and lose out on sales. Brew a batch when supply is low and capture sales throughout the day.
- Clean and Rinse features allow a thorough cleaning of the dispenser, brew basket and tubing.
- Programmable water volume and contact time provide complete control of extraction and taste profile.
- Large gourmet stainless funnel can hold up to 16oz of ground coffee.
- Brew through lid on cold brew dispenser.
- Low profile design prevents coffee from being dispensed until after brew cycle is complete and placed on serving stand eliminating inconsistent drink quality.

Cold brew coffee has become a favorite with consumers of all ages and is quickly becoming a mainstay in the coffee category. With reduced acidity and bold coffee flavor, consumers are enjoying cold brew during all day parts increasing sales and profitability for operators and retailers. Newco's patent pending design automates and takes the headache and mess out of the process of preparing cold brew coffee.

Prepare authentic, delicious cold brew coffee in a fraction of the time as traditional methods. Prepare up to 1.5 Gallons of cold brew in just over one hour compared to 12-24 hours.
