Set-up on the 20:1 Brewing system is easy. Simply plumb in the water supply, plug in the system's built in cord, and turn the machine on. The 20:1 system will sense a dry probe and begin filling the tank automatically. Once the water in the tank has reached the proper level, the element will automatically turn on and begin heating. In minutes, the correct brewing temperature will be reached, and you're ready to brew!

Brew your favorite coffee or iced tea with perfect precision.

Technical Features

- 3 Independent Brew Selections with adjustable Brew time and Brew volume.
- Modular Tank and Automated System
- Universal Base easily locates container and eliminates counter top messes.
- Modular Cabinet you can easily convert the brewer height with patented Riser system.
- Hot Water Faucet can be located on either side. (Special order on right)
- Gourmet Spray head for rain drop brewing.
- Easy Set-Up!
